Animesh Srivastava

919.321.7627 | animeshs@cs.duke.edu | https://users.cs.duke.edu/~animeshs/

Education

Duke University *Durham, USA*

Ph.D., Department of Computer Science *Aug. 2012 - Present*

- Adviser: Dr. Landon Cox

Indian Institute of Technology Kharagpur *West Bengal, India*

M.S., Department of Computer Science & Engineering *Jan. 2010 - July 2012*

- CGPA: $9.51/10$
- Thesis Topic: *Impact of Attacks on Correlated P2P Network Topology: A Complex Network Approach*

Haldia Institute of Technology *West Bengal, India*

B.Tech., Department of Computer Science & Engineering *Aug. 2003 - July 2007*

- Department Rank #1 (CGPA: $8.81/10$)
- Senior Thesis Topic: *FEcST: A Hybrid Routing Algorithm for MANET*

Research Projects

ePrivateEye *Duke University*

Realtime detection of sensitive regions in camera view using edge computing *March 2017 - April 2017*

- Modified Android OS module, camera service, to intercept the image data, block sensitive regions and deliver to apps.
- Offloaded heavy computer vision algorithm to edge servers for realtime frames per second delivery.
- Deployed the system over home network, business network and Amazon cloud infrastructure.
- **Keywords:** Visual privacy, Android camera service, Edge computing.

CamForensics *HP Labs, Duke University*

Understanding visual privacy leaks from Android apps *May 2016 - April 2017*

- Developed a system to detect known sensitive image processing by a native library of an app during runtime.
- Used Intel's Pin tool to instrument an Android process dynamically to collect the sequence of function invocations.
- Used convolutional neural network (CNN) to map a sequence of function invocation to a image processing task.
- Conducted comprehensive user study to demonstrate the disconnect between app description and user's expectation.
- **Keywords:** Visual privacy, Dynamic binary instrumentation, Neural network, User study.

PrivateEye *Duke University*

On-device (Android) detection of sensitive regions in camera view *Jan. 2014 - Feb. 2016*

- Designed *privacy marker* to mark two-dimensional regions, and instrumented Android camera service to intercept camera frame data, recognize *privacy marker* and apply privacy policies before delivering the camera data to an app.
- Implemented a pipeline framework to speedup the detection of *privacy marker* and deliver frames at a median rate of 20 FPS.
- **Keywords:** Visual privacy, Computer vision, Android camera service.

Collocate *HP Labs*

Realtime detection of personally collocated smartdevices *May 2014 - Dec. 2014*

- Designed and implemented a lightweight Bluetooth Low Energy (BLE) based protocol for a smartwatch and smartphone to determine if they are collocated with the same user.
- Implemented step detection algorithm and optimized BLE traffic to keep the smartwatch and the smartphone in sync.
- **Keywords:** Bluetooth low energy, Step detection.

SwingAR *Duke University*

Computer vision and geometry based indoor localization *Aug. 2012 - April 2013*

- Implemented an Augmented Reality (AR) app to overlay textual information on physical world in an indoor setting.
- Implemented dead-reckoning technique to handle the noise in various sensors.
- Used computer vision algorithm to localize the user and correct errors introduced due to the noise in sensors.
- **Keywords:** Augmented reality, Dead reckoning, Computer vision.

Work Experience

HP Labs *Palo Alto, CA, USA*

Research Intern *May 2016 - Dec. 2016*

- **Mentor:** Puneet Jain
- **Project:** CamForensics

HP Labs *Palo Alto, CA, USA*

Research Intern *May 2014 - Dec. 2014*

- **Mentor:** Jeremy Gummeson and Mary Baker
- **Project:** Collocate

Wipro Technologies *Bangalore, India*

Project Engineer *June 2007 - July 2009*

- **Project:** Implemented WIA2.0 scanner drivers for Windows Vista

Selected Conference Publication

SEC 2017	*"ePrivateEye: To the Edge and Beyond!"*, C. Streiff, A. Srivastava, V. Orlikowski, Y. Velasco, V. Martin, N. Raval, A. Machhanavajjhala, L. Cox
SenSys 2017	*"CamForensics: Understanding Visual Privacy Leaks in the Wild"*, A. Srivastava, P. Jain, D. Soteris, L. Cox
Mobisys 2016	*"What You Mark is What Apps See"*, N. Raval, A. Srivastava, A. Razeen, K. Lebeck, A. Machanavajjhala, L. Cox
HotMobile 2015	*"Step-by-step Detection of Personally Collocated Mobile Devices"*, A. Srivastava, J. Gummeson, M. Baker, K. Kyu-Han
UPSIDE 2014	*"Markit: privacy markers for protecting visual secrets"*, N. Raval, A. Srivastava, K. Lebeck, L. Cox, A. Machanavajjhala
Ubicomp 2013	*"If you see something, swipe towards it: crowdsourced event localization using smartphones"*, R. Ouyang, A. Srivastava, P. Prabahar, R. R. Choudhury, M. Addicott, F. McClernon
SASO 2012	*"Can Degree Correlation Help to Design Resilient Superpeer Networks?"*, A. Srivastava, B. Mitra, F. Peruani, N. Ganguly
SCNC 2011	*"Attacks on Correlated Peer-to-Peer Networks: An Analytical Study"*, A. Srivastava, B. Mitra, F. Peruani, N. Ganguly

Patents and Disclosures

1. Controlling devices based on collocation of the devices on a user (**PCT/US2014/065847**)
   J. Gummeson, M. G. Baker, A. Srivastava and S. Mare
2. User authentication device (**PCT/US2015/016958**)
   J. Gummeson, M. G. Baker and A. Srivastava
3. Indoor Object Positioning System using Smartphones (Duke Internal Review)
   R. R. Choudhury and A. Srivastava

Honors & Awards

Travel Awards: Sigcomm10, MobiSys14, OSDI14, SOSP15, MobiSys16

Feather In My Cap, Delivering at consecutive critical deadlines, **Wipro Technologies**

Distinction, National Mathematics Olympiad Contest, All India Schools Mathematics Teachers Association 2002

Finalist, National Level Science Talent Search Examination, 2001
